## Statement/expressions

Aspect	Expression	Statement
Definition	Gives a value or result	Does an action
Purpose	Calculates or evaluates	Controls program flow
Example	$x + y$ , $a * (b - c)$	<code>int a = 5;</code> , <code>if</code> , <code>for</code>

## Statement/expressions

### Example 1: Variable Declaration

`int a; // Statement (declares a variable)`

### Example 2: Assignment Statement

`a = 10; // Expression (assigns a value to a variable)`

## Relational operators(Binary Operators)

Used to compare values, resulting in a Boolean value (1 for true, 0 for false).

Operator	Description	Example
==	Equal to	a == b
!=	Not equal to	a != b
>	Greater than	a > b
<	Less than	a < b
>=	Greater than or equal to	a >= b
<=	Less than or equal to	a <= b

## Relational operators

Operator	Description	Example	Output
==	Equal to	<code>printf("%d", 5 == 5);</code>	1
!=	Not equal to	<code>printf("%d", 5 != 10);</code>	1
>	Greater than	<code>printf("%d", 15 &gt; 10);</code>	1
<	Less than	<code>printf("%d", 7 &lt; 12);</code>	1
>=	Greater than or equal to	<code>printf("%d", 75 &gt;= 50);</code>	1
<=	Less than or equal to	<code>printf("%d", 16 &lt;= 18);</code>	1

## Relational operators

### ❑ Precedence and Associativity of Relational Operators :

•<=, <, >, >=

### ❑ Precedence and Associativity:

- All relational operators have the same precedence.
- They follow left-to-right (L-to-R) associativity.

Operator Category	Operators
Unary	+, -
1	%, *, /
2	+, -
3	<, <=, >, >=
4	!=, ==
5	=

## Relational operators

## Relational operators

## Logical Operators

- 
- ```
graph LR; A["1. Logical AND(&&)"] --- B["2. Logical OR(||)"]; B --- C["3. Logical NOT(!)"]; C --> D["Binary Operator"]; C --> E["Unary Operator"];
```
1. Logical AND(&&)
  2. Logical OR(||)
  3. Logical NOT(!)
- Binary Operator
- Unary Operator

The result of logical operator is always either 0 or 1

## 1.Logical AND(&&)

a

&&

b

Non-zero(true)

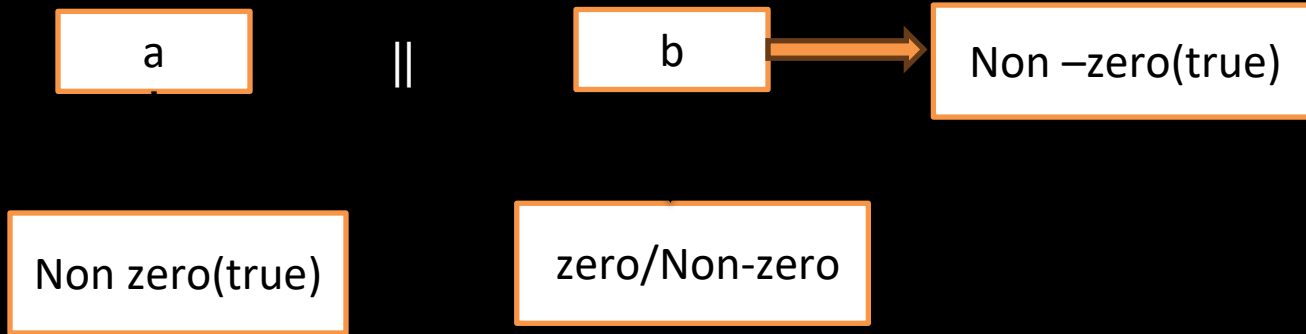

Non zero(true)

Non -  
zero(true)

## 1.Logical AND(&&)

| a | b | a &&b | output |
|---|---|-------|--------|
| T | T | T     | 1      |
| T | F | F     | 0      |
| F | T | F     | 0      |
| F | F | F     | 0      |

## 1.Logical OR(||) (CHOICE)

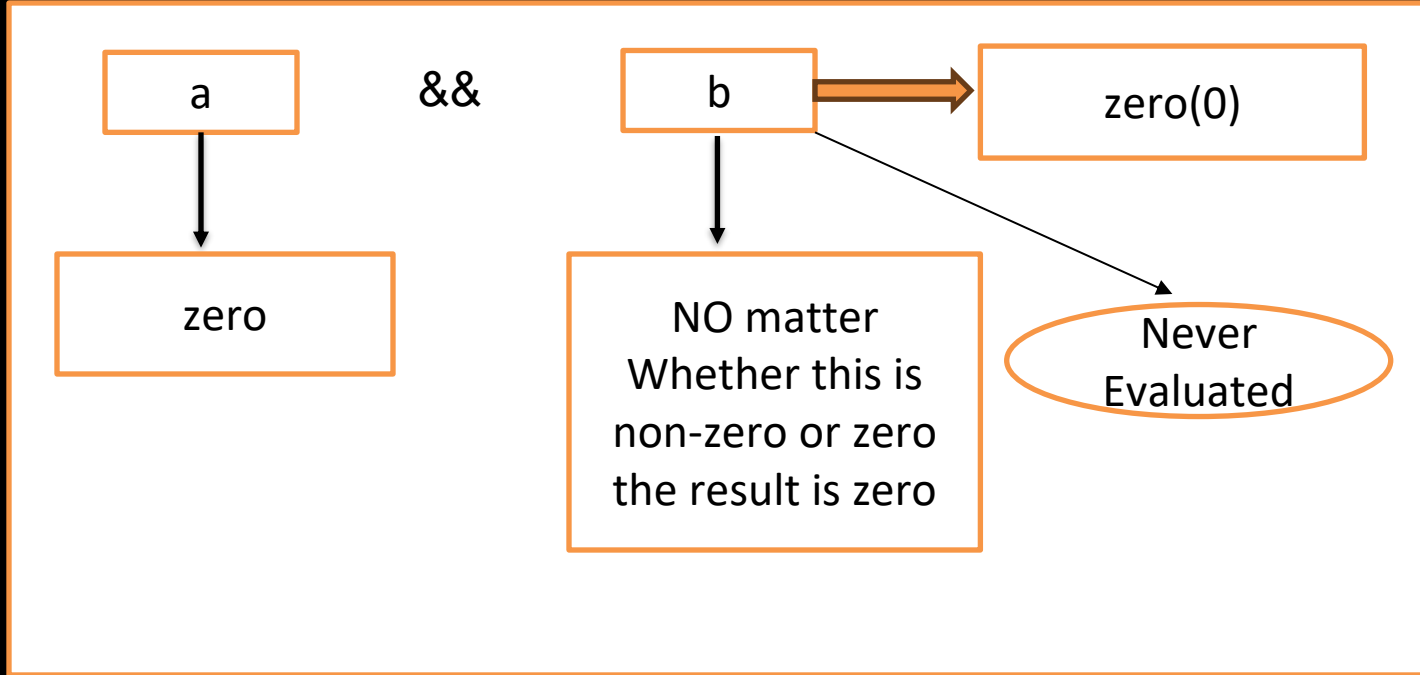

## 1.Logical OR(||)

| a | b | a    b | output |
|---|---|--------|--------|
| T | T | T      | 1      |
| T | F | T      | 1      |
| F | T | T      | 1      |
| F | F | F      | 0      |

## 1.Logical NOT(!)

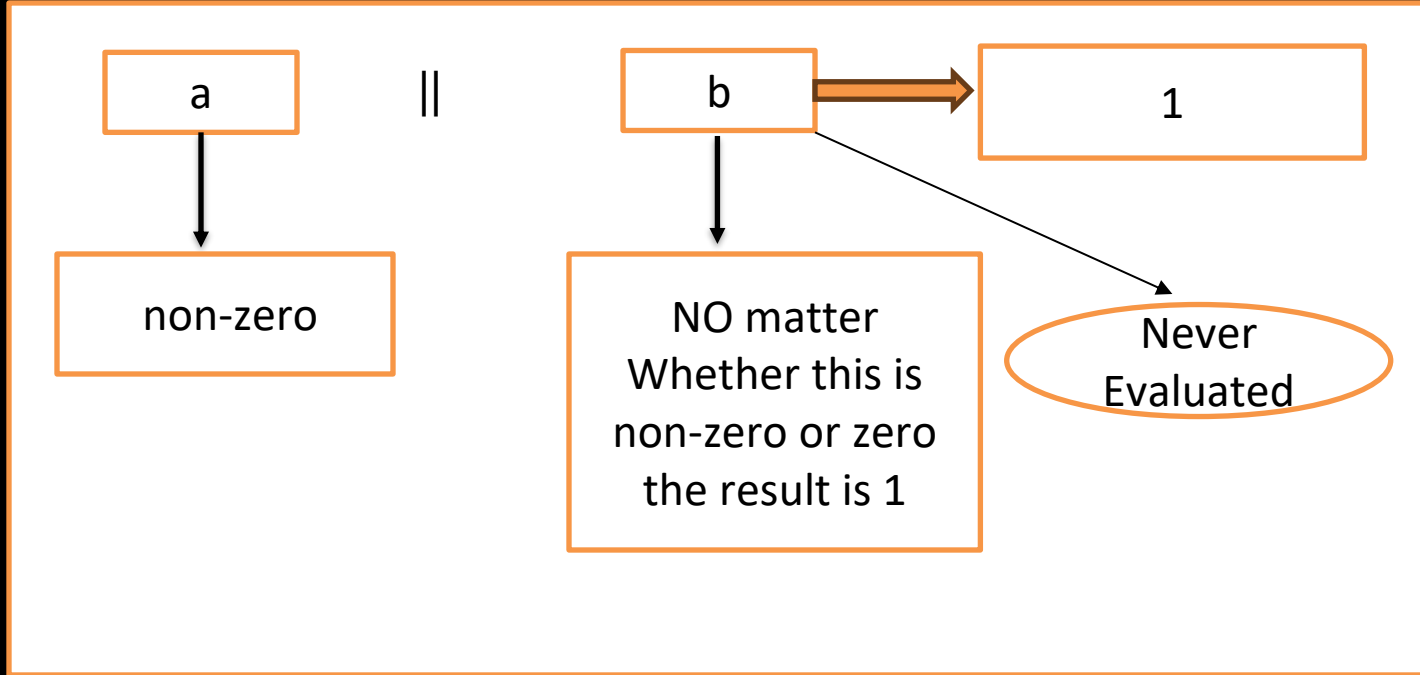

| !a | output |
|----|--------|
| !T | F      |
| !F | T      |

## Short-circuit evaluation

## Short-circuit evaluation

## Precedence Order of Operators

| Precedence Order     | Operators     |
|----------------------|---------------|
| Unary Operators      | +, -, !       |
| Arithmetic Operators | %, *, /, +, - |
| Comparison Operators | <, <=, >, >=  |
| Equality Operators   | ==, !=        |
| Logical AND Operator | &&            |
| Logical OR Operator  | ,             |
| Assignment Operator  | =             |

The banner features a dark background with blue and white geometric patterns. On the left, there are two circular profile pictures: the top one shows a man with glasses and a blue shirt, and the bottom one shows a man in a red and white checkered shirt. On the right, the text 'Follow me on' is followed by an Instagram icon and the handle '@jayesh\_kande\_', and a YouTube icon with the text 'JK Coding Pathshala'.
