## Armstrong number

What is an Armstrong Number

$$1^3 + 5^3 + 3^3 = 153$$

153

$a = 153 \% 10 = 3$

$y = x / 10 = 153 / 10 = 15$

$b = y \% 10 = 15 \% 10 = 5$

$c = 15 / 10 = 1$

```
#include <stdio.h>
```

```
void main() {
```

```
    int a, b, c, x, y, d;
```

```
    printf("Enter a number: ");
```

```
    scanf("%d", &x);
```

```
    a = x % 10;
```

```
    y = x / 10;
```

```
    b = y % 10;
```

```
    c = y / 10;
```

```
    d = (a * a * a) + (b * b * b) + (c * c * c);
```

```
    if (d == x)
```

```
    |     printf("It is Armstrong");
```

```
    else
```

```
    |     printf("It is Not Armstrong");
```

```
    getch();
```

```
}
```

An Armstrong number (also known as a Narcissistic number) is a number that is equal to the sum of its own digits, each raised to the power of the number of digits. For example:

- 153 is an Armstrong number because  $1^3 + 5^3 + 3^3 = 153$ .
- 9474 is an Armstrong number because  $9^4 + 4^4 + 7^4 + 4^4 = 9474$ .

$x=153$

$t=153\%10=3,5,1$

$s=s+(t*t*t)=0+(3*3*3)=27$   
 $=27+(5*5*5)=152$   
 $=152+(1*1*1)=153$

$y=y/10$   
 $y/10=153/10=15$   
 $=15/10=1$   
 $=1/10=0$

$x==s$

```
#include <stdio.h>
```

```
void main() {  
    int x, y, t, s = 0;  
    printf("Enter a number: ");  
    scanf("%d", &x);  
  
    y = x;  
    while (y != 0) {  
        t = y % 10;  
        s = s + (t * t * t);  
        y = y / 10;  
    }  
  
    if (x == s)  
        printf("It is Armstrong");  
    else  
        printf("It is Not Armstrong");  
  
    getch();  
}
```

$b=123\%10=3$

$S=0+3=3$

$X=123/10$

$b=12\%10=2$

$S=3+2=5$

$X=12/10$

$b=1\%10=1$

$S=5+1=6$

$X=1/10=0$

(loop break condititon)

Sum Of Digits

Enter a number: 123  
Sum of digits = 6

$b = 123 \% 10 = 3$   
 $S = 0 * 10 + 3 = 3$   
 $X = 123 / 10$

$b = 12 \% 10 = 2$   
 $S = 3 * 10 + 2 = 32$   
 $X = 12 / 10$

$b = 1 \% 10 = 1$   
 $S = 32 * 10 + 1 = 321$   
 $X = 1 / 10 = 0$   
(loop break condititon)

Reverse of Number

Enter a number: 123  
Reversed number = 321

$b=121\%10=1$   
 $S=0*10+1=1$   
 $X=123/10$

$b=12\%10=2$   
 $S=1*10+2=12$   
 $X=12/10$

$b=1\%10=1$   
 $S=12*10+1=121$   
 $X=1/10=0$   
(loop break condititon)

palindrome number

Enter a number: 121  
Reversed number = 121
